

31 October, 2014

The Hon Clive Palmer, MP
Member for Fairfax
PARLIAMENT HOUSE
CANBERRA ACT 2601

Dear Mr Palmer,

Just a short note to say thank you on behalf of the 13 Tasmanian farmers I represent for ensuring that the carbon projects we developed for them will be able to continue under the Governments proposed Direct Action Scheme.

The significance of passing the CFI Amendment Bill for many rural Australians who have already made significant investments in climate action seems to have been lost in political point scoring or be too complicated for most media commentators to understand.

Like many Australians, I believe that if we are serious about tackling climate change we must encourage governments to use every available tool. Regulation, pricing mechanisms and encouraging direct action are all needed.

Kind Regards

Virginia Young
